

October 2017

At National Plumbing we are committed to providing our clients with the best customer service, with the best trained staff, at the best price in the industry. It's the National Plumbing guarantee!

Water Pressure Reducing Valves

Ensuring Practical, Safe Working Water Pressures Municipal and private water supply companies use pumps and pumping stations to boost water supply pressures in supply mains to be able to supply water for fire fighting, high rise buildings to overcome loss of pressure as the elevation increases, and to maintain water supply in water towers and supply tanks. Pressure in water supply mains can exceed 200psi.

Promoting Water Conservation

High water pressures waste water. Many municipalities today not only charge homeowners and businesses high rates for water consumption, but also charge consumers equally high rates for the disposal of wastewater. Furthermore, reducing water consumption, reduces the excess energy required for heating additional hot water.

The Plumber Riddle

Why was the plumber
so tired?

He was drained

Happy Birthday

Etsik 10/21
Mooshon 10/26
Alexander 10/27

Celebrating 18 years

Ali

Celebrating 6 years

Ruth

First year celebration

Breanna (second round)

Welcome aboard!
